1. NEW STANDARD FORM 66 IN DEVELOPMENT: The Air Force Departmental Publishing Office (AFDPO), with assistance from the Office of Personnel Management, will work to develop a military personnel version of the Standard Form (SF) 66, Official Personnel Folder. AFDPO has stepped up and taken responsibility for the initiative which, ultimately, may drive a Department of Defense usage requirement, not just an Air Force requirement.

For organizations which have not disposed of Standard Forms 66, you may continue to maintain the files in the existing SFs 66 until the new form becomes available. However, if creating a new file, do not use the SF 66; instead, use a plain folder. **Repeat--Do not use the SF 66 to create a new file; instead, use a plain folder.** For organizations which complied with the initial guidance and took corrective action, we appreciate your efforts in complying with the guidance and apologize for any inconvenience.

As of this date, we do not have a timeline for the development and approval of this form. We'll keep you informed as information becomes available. If you have any questions, please contact Ms Phyllis Conrad, DSN 487-6203. **(HQ AETC/SCMY, DSN: 487-6203)**

***4. ATTENTION VISUAL INFORMATION CUSTOMERS:** The Base Visual Information Support Center now has its own WEB site. It is located under the 47Communications Squadron as Visual Information. Videoteleconference schedule is viewed on this site along with a new photo gallery. The AETC Video teleconference network has proved to be an invaluable communications tool that serves both senior leadership and common user requirements. It has saved scarce TDY resources and countless hours away from duty stations while improving the quality of corporate communications.

In our ongoing efforts to maximize the effectiveness of the video teleconference system, we have extended our services to talk to VTC sites throughout CONUS (Continental United States), Europe, PACAF and commercial sites. Connectivity to this global network will ensure future availability to other MAJCOMs as well as our sister services and will give AETC "Vidlink" worldwide access to over 1600 registered users.
